

MINISTRY OF YOUTH, SPORTS & CULTURE OF ETHIOPIA (MYSC)

National culture Policy

INTRODUCTION

In accordance with the agreement reached by the General Assembly of the United Nations Educational Scientific and Cultural Organization held in Mexico City in 1982, culture is defined as a concept which incorporates all intellectual, ethical, physical, technical and other activities that characterize humankind as a rational being. It also involves the ability of man to learn and train himself in moral, technical and other spheres of knowledge. Culture is a wide concept which include the modes of life, beliefs, traditions and the whole set of the material and spiritual wealth which characterize a certain society as distinct from others.

In the context of the cultures of the peoples of the various nations, nationalities, and peoples of Ethiopia, this definition could be used to incorporate their varied social, economic, political, administrative, moral, religious and psychological conditions. The languages, history, oral tradition, housing, instruments of production, food preparation eating habits, costumes, ornamentation, aesthetic values and appreciation, beliefs and religious practices are also components of their cultures.

The spritual ceremonies related to birth, wedding and death, principles of mutual cooperation and communal concerns that emanate from kinship, neighborhood and other types of relationships, traditional ways of social governance, traditional health care practices and many other related aspects of their respective communities are also included. As the concept of culture encompasses varied aspects of wider scope, it plays a major role in the national development process. Nowadays it has become a global conviction that any development program that does not pay due attention to culture cannot bear fruit. However, neither the past regimes nor the members of the ruling class were able to accept this reality; and there was not a time when a development policy that considered the culture of the people has been put into effect. On the contrary, they were engaged in promoting polices designed to consolidate political systems that insured the continuation of their personal powers and welfare. To this effect, they followed a discriminatory policy by seeding enmity among peoples and regarding the culture of a certain nation or nationality as superior and looking down upon the cultures of others.

Even though some governmental measures have recently been takes to promote the cultural sector, they fell short of creating a proper understanding of the concept of culture. Instead, these measures were limited to organizing few narrowly envisaged cultural establishments. In relation to the modern political, economic and social establishments and enterprises created in the country, these cultural establishments came very late and this indicates the low consideration that was given to the sector. This low consideration hindered the sector to contribute its part in the development program of the country.

Today due consideration is reached to base every developmental activities on the peoples culture. Therefore, the Government of the Federal Democratic Republic of Ethiopia (FDRE), which is making effort to give solutions to the complex problems of the cultural sector has issued Proclamation No.4/1995 to restructure the office in charge of cultural affairs, so that its operation shall commensurate a democratic system. However, structural change alone would not bring about the development of the sector. Therefore, it is imperative to have a popular cultural policy that would set the direction of the sector's development. It is also important to note that the sector was denied due attention from the government and the people, who are directly concerned to it, are denied the right to actively participate in the development of the sector.

Cognizant of the fact it is high time the heritage, history, fine arts, handicraft and folk art (tales, proverbs, popular poetry, dance, songs, etc..) of the nations, nationalities and people of Ethiopia are collected, registered, analyzed and preserved from any form of adulteration, and that these are given equal recognition and right to develop;

Cognizant of the need to step by step abolish the deep rooted causes of poverty, indolence, misconduct, prejudice against women, chauvinism and problems related to family planning and reproductive health, backward tradition that are popularly known as "harmful culture" and are deterrent to development and progress, practices that violate human rights and harmful traditional practices causing physical, psychological and moral damages; all practices that defy social values and norms as well as artistic performances, cinema shows and other media productions such as books and press outputs that would negatively affects the welfare of the youth and to withstands all forms of acculturation;

Instead, to create favorable situations that would enable all citizens to participate in Cultural and creative activities and fulfill their spiritual needs; and to inculcate equality of the sexes, companioship and industriousness, respect to mankind and work, and an initiation towards development and progress; and to promote national, continental and international cooperation on the basis of the equality of all Cultures and mutual benefit;

Considering the necessity of putting into effect the constitutional right of the people of Ethiopia that guarantee equal recognition and respect to the culture of nations, nationalities and peoples; of bringing about the practical application of article 9/4 of the constitution of the Federal Democratic Republic of Ethiopia that reads, "All international agreements ratified by Ethiopia are an integral part of the law of the land", and article 39/2 that reads, "Every nation, nationality and people in Ethiopia has the right to speak, to write and to develop its own language; to express, to develop and to promote its culture; and to preserve its history";

Determined to take advantage of the conducive conditions created to the development of culture by the democratic and federal system of administration that the country chose to follow and, according to which, the opening of central and regional office to carry out cultural activities is made possible, as well as the decentralization of trained man power and finance.

Taking into account article 51/3 of the constitution which states the federal government "shall establish and implement national standards and basic policy criteria for public health, education, science and technology as well as for the protection and preservation of cultural and historical

legacies";

This cultural policy is endorsed by the council of Ministers of the FDRE on October 1997 and is put into effect.
